Online ENGLISH PROGRAM

- ✓ Join class wherever you are
- ✓ Experience the same quality and environment as offline course
- ✓ Master online learning skills

WHY Study English Online

Speak English with confidence in an international English-speaking environment without traveling.

FPT University's Online English Program by Numbers

100%

100% of participants said, "I have more confidence in speaking in English"

93.4%

93.4% of the participants rated "I would like to recommend my friends an online English program"

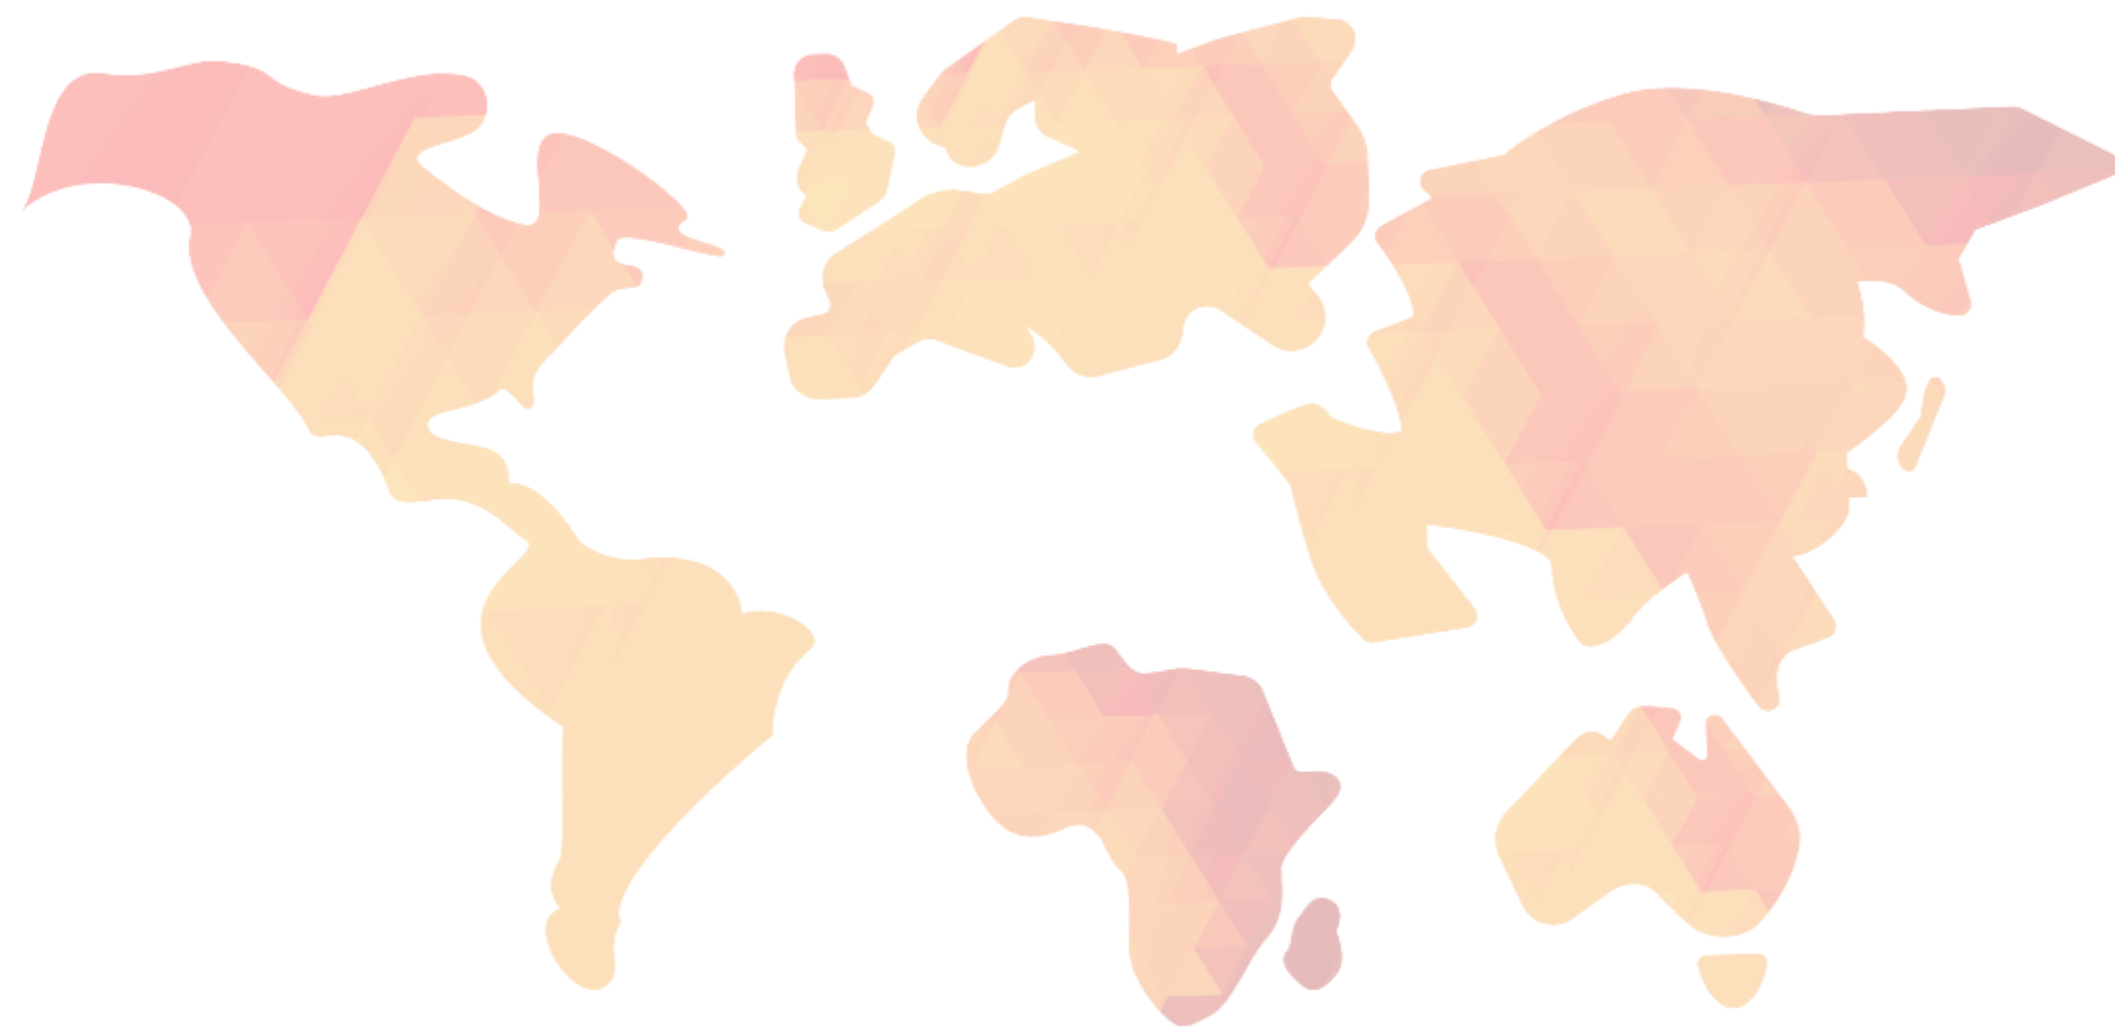

61%

61% of participants want to participate in the next online English program

We combine the elements Japanese students enjoyed about our English programs in the past and the advantages of online learning.

Online study does not mean limited interaction.

What Students Liked

- ✓ English study is fun and has many exciting activities
- ✓ Students get to speak to many friends in English, not just study with teacher

Online Study Advantages

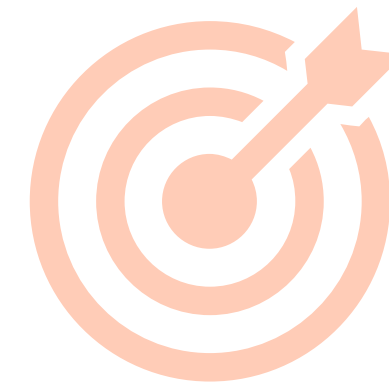

- ✓ Flexible schedule
- ✓ Personalized attention to each student is possible in a small-sized class
- ✓ Students make use of virtual communication tools to connect with international friends and foreigners

Program Highlights

GLOBAL CLASS

Study English with ASEAN classmates for cultural and idea exchange

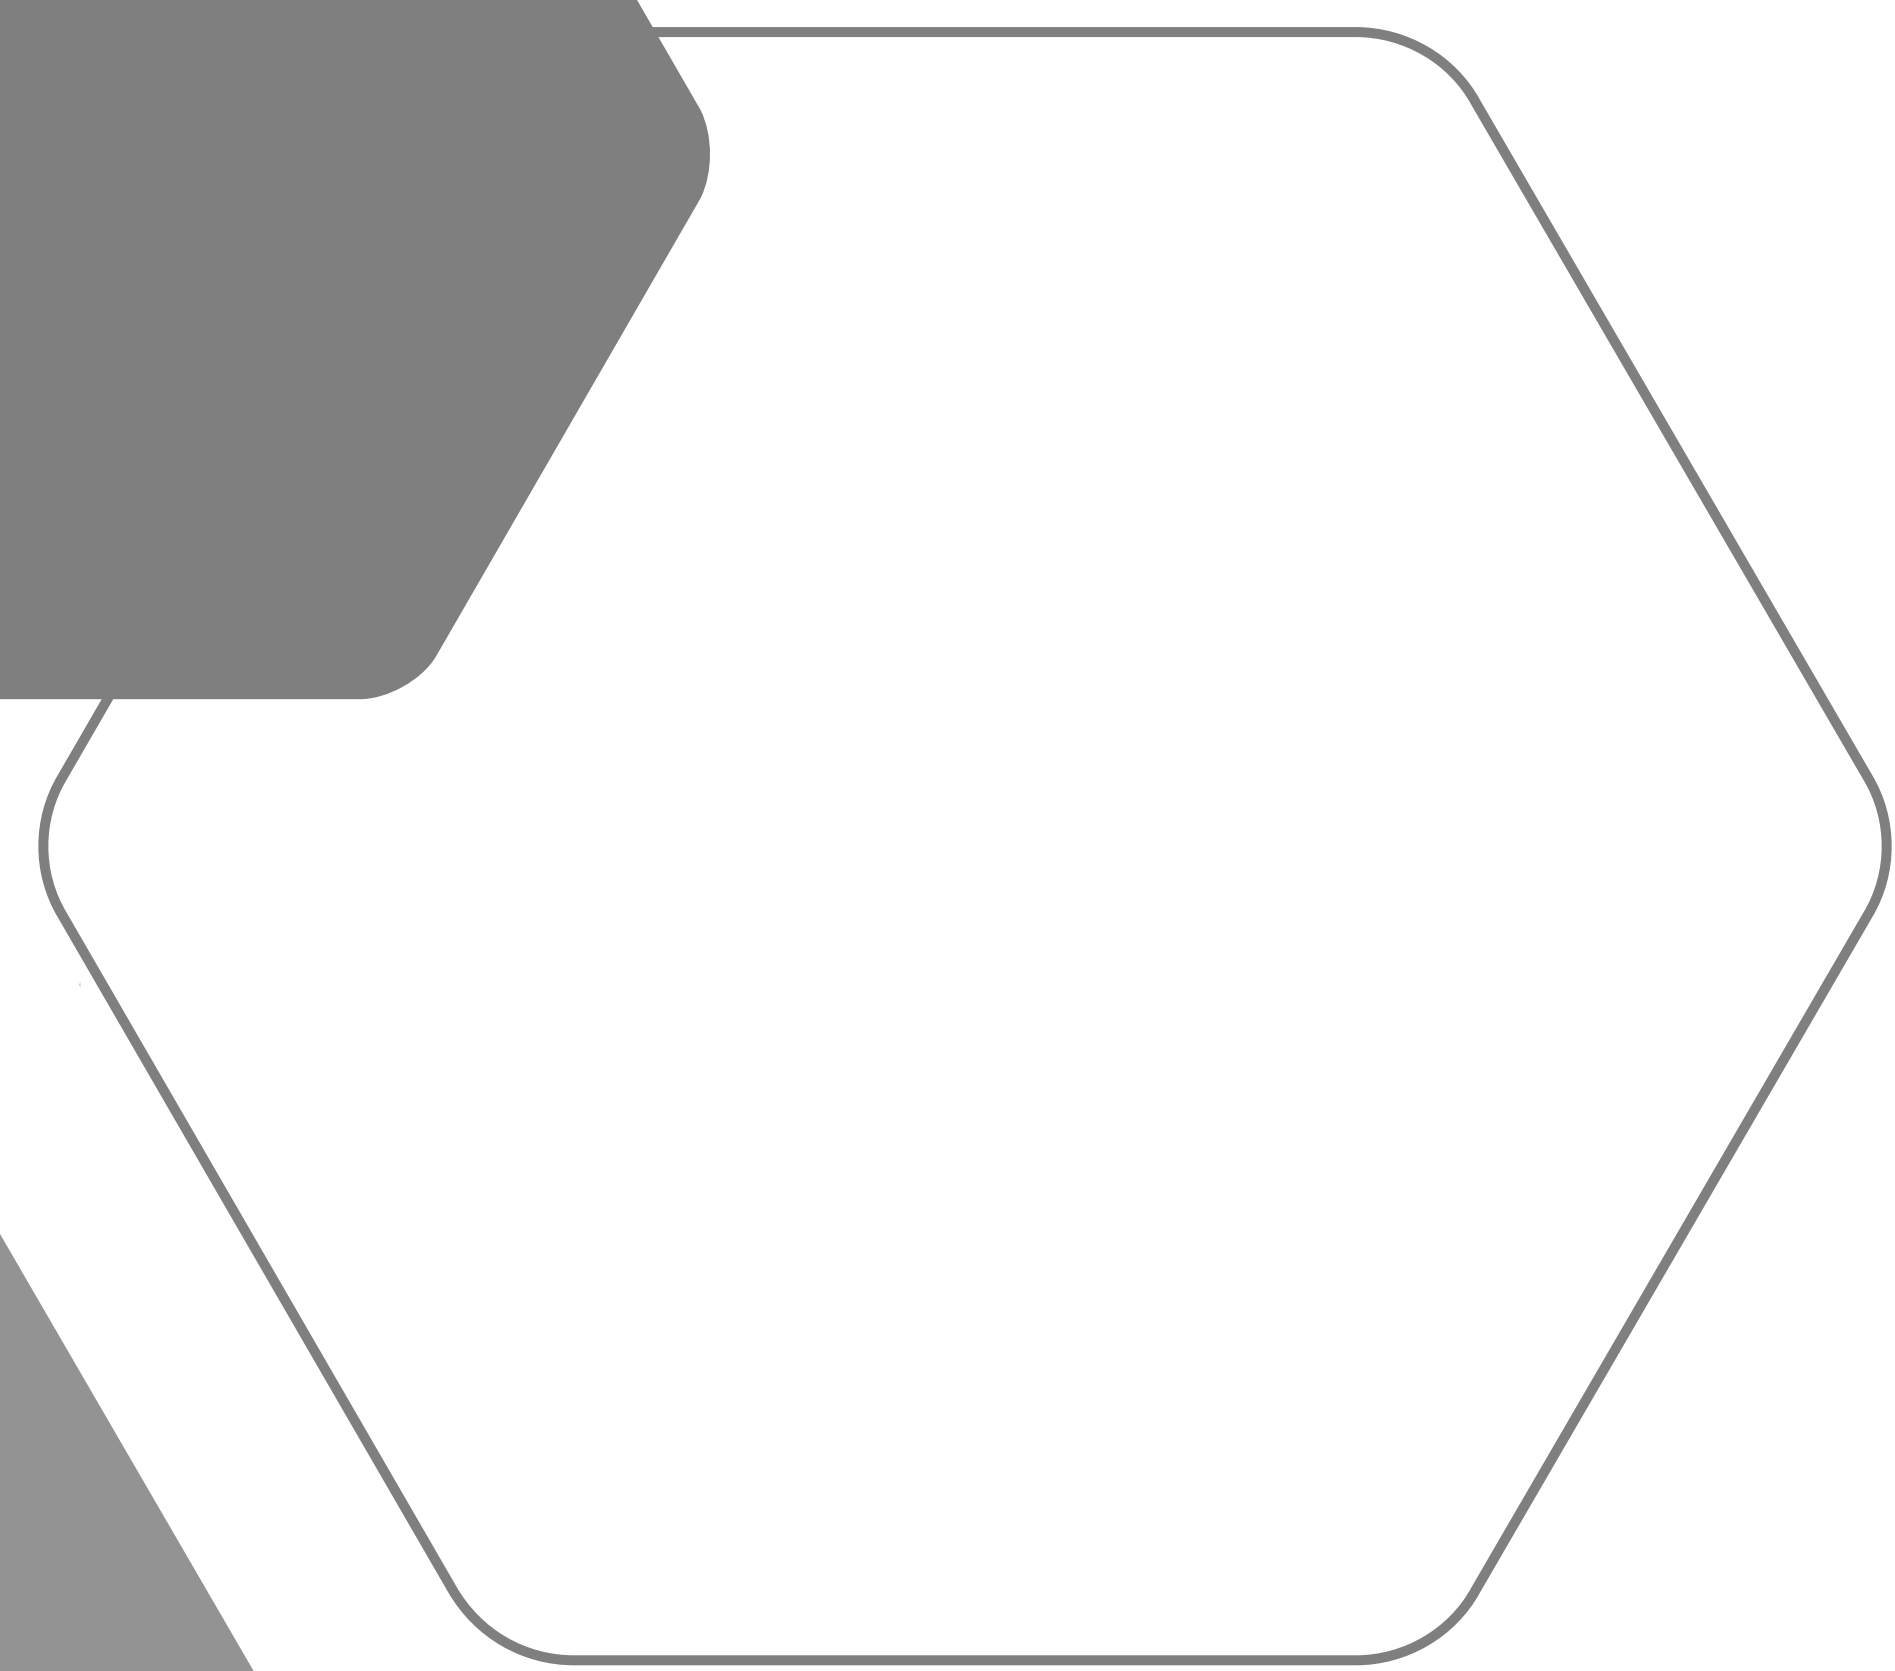

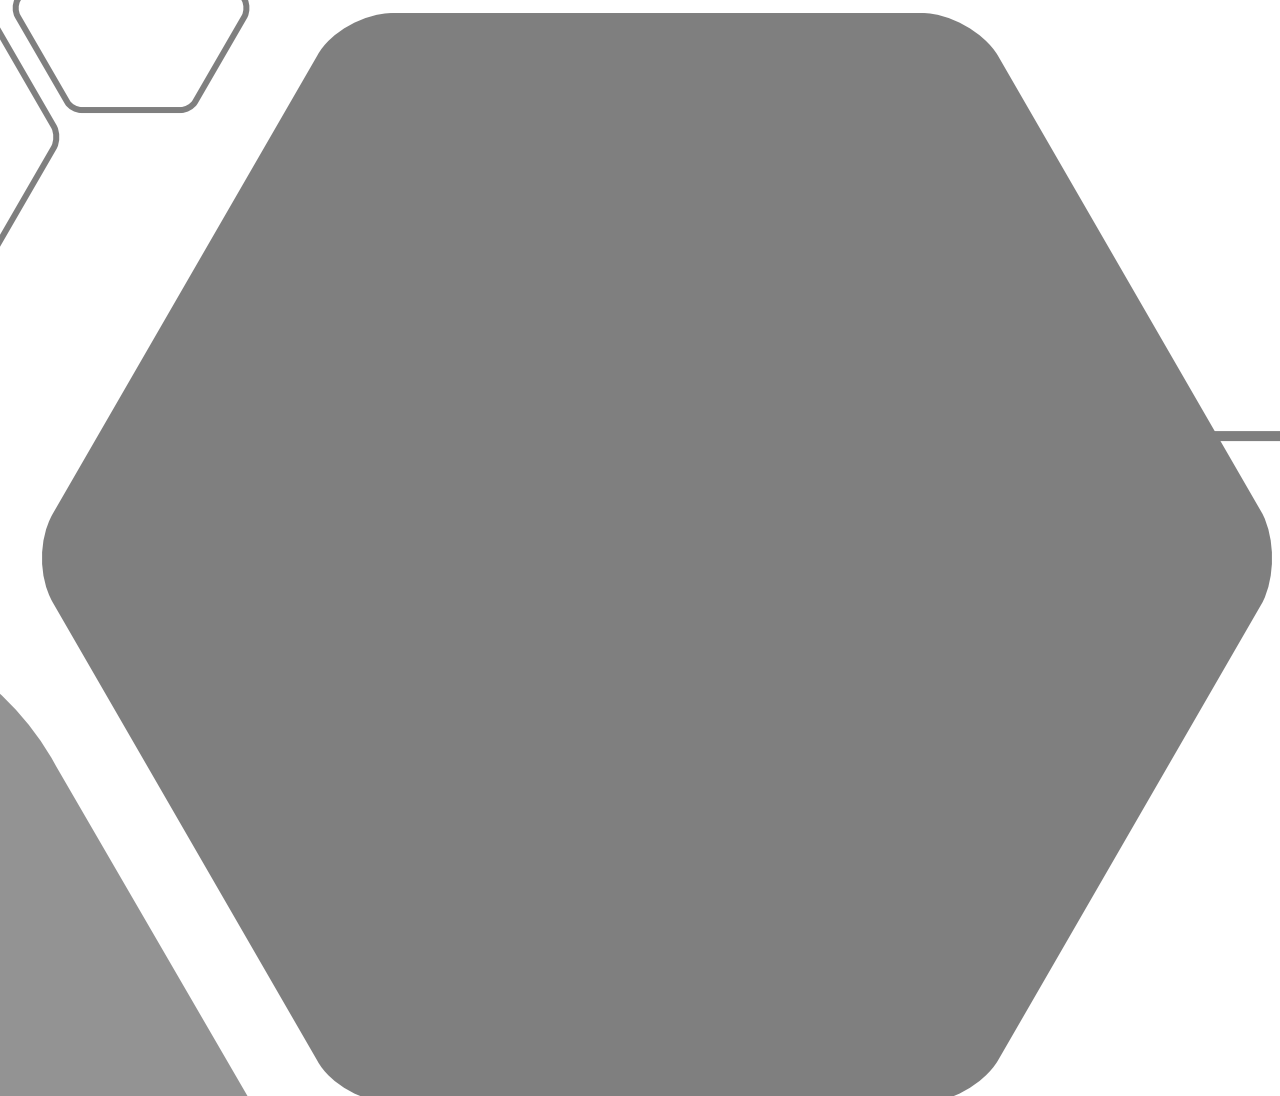

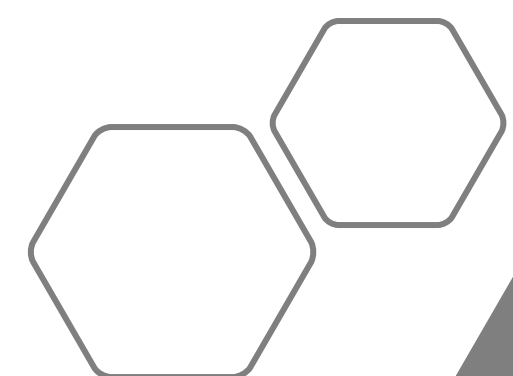

CHALLENGES

Challenge: Learn, Engage, Step Up gives students opportunities to practice English in a fun and engaged way

ENHANCED INTERACTION

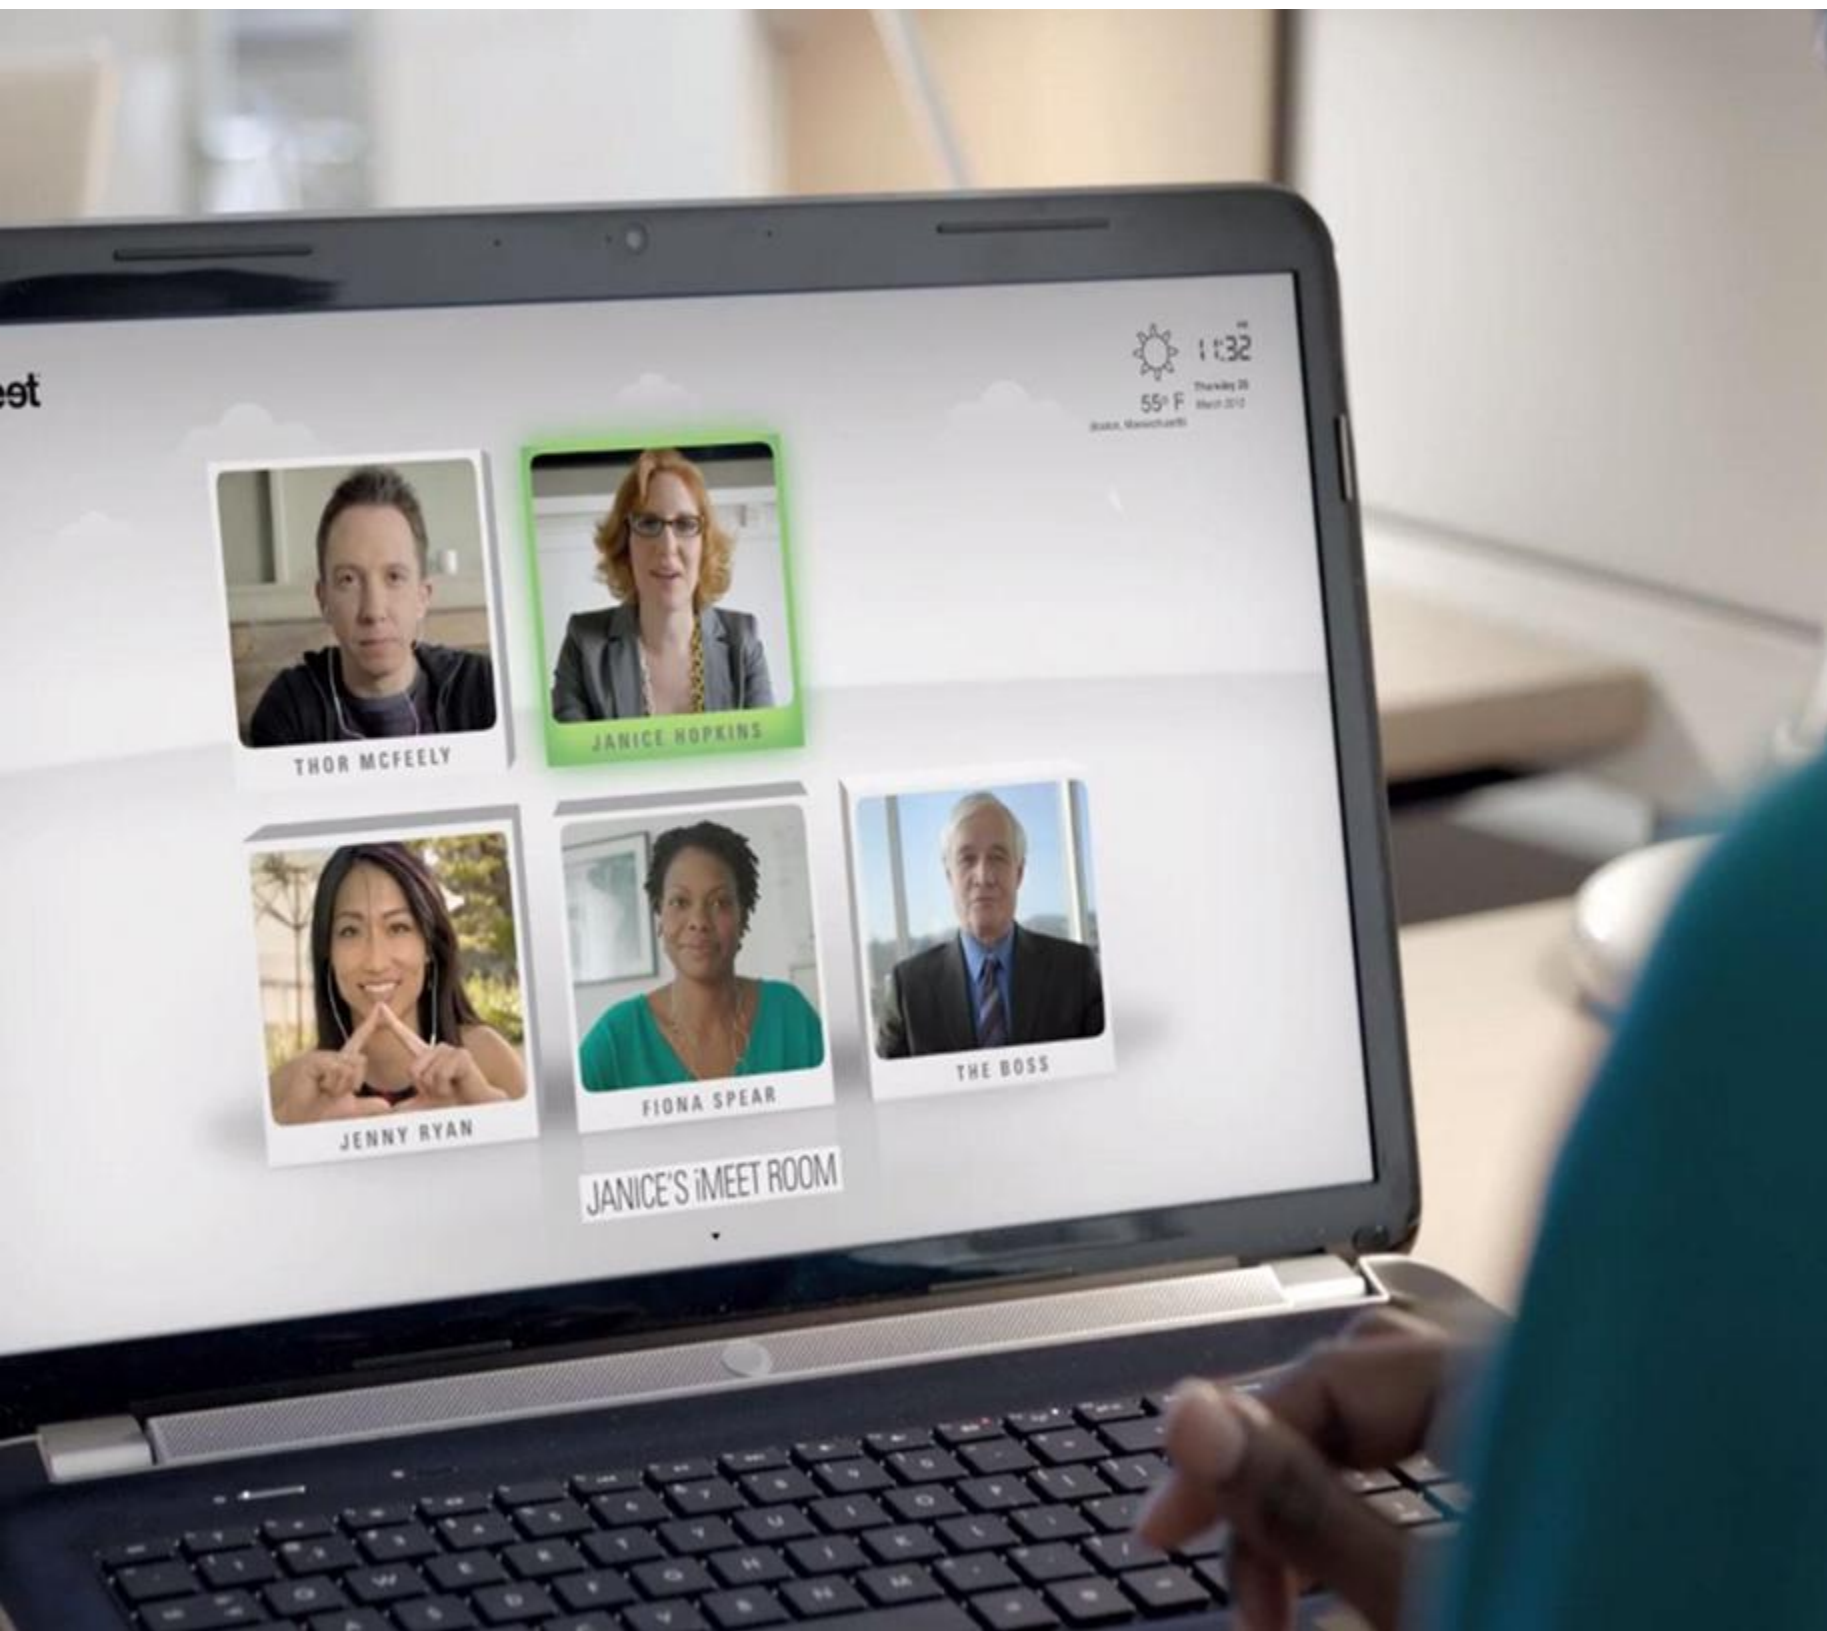

Students' interaction in English with foreigners is enhanced through various program activities in- and outside of class

PROGRAM COMPONENTS

To get familiar with online learning

Orientation

Program Explanation

Students meet with Program Coordinator and join orientation about the program agenda

Problem-Solving

Students receive tips and advice for studying online effectively. They will learn about (1) online study and communication tools to maximize study results and (2) cultural differences to expect while in a global classroom. We will guide students how to resolve some issues they may face during the program

How to Study English Effectively

Student gain insights about how to improve their English skills. In addition, with the small class size, our speaker will offer individual English study tips for every student

To up their English skills

English Online Classes

English training

The aim of the course is to give students opportunities to practice speaking English and help them boost confidence in communication. Students take in-class training, which is divided into 1.5-hour classes.

Small classroom

With the class size of 4 – 5 students per class, we can ensure individual attention to each student while also facilitating cultural exchange among students.

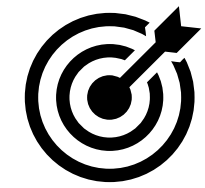

Off classroom interaction activities

After English lessons, students will join in Pair Tutoring for 1 hour a day to mingle out and exchange cultures with classmate in small group size

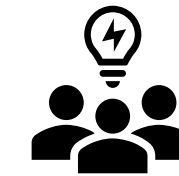

To take their learning one step further

Challenge: Learn, Engage, Step Up

Overview

To replace the in-class interaction of traditional face-to-face learning, we designed a challenge to facilitate students' involvement with the online class – Learn, Engage, Step Up. This challenge's aim is to ensure that all students are engaged and still have many chances to actively speak English with foreign people.

Engage

During Engage challenge, all students join Share-and-tell activities to speak about things that are relevant to their daily life. Engage activities help students practice expressing themselves better and learn about the life of students in other countries.

Learn

During regular class time, students learn the basic English skills and knowledge to express themselves about daily life topics.

Step Up

While Engage challenge involved Share-and-tell activities in class, Step Up challenge will require students to prepare some work before the final lesson about each topic. Through the work brainstorming and preparation process, students can speak up their mind, step up and express more complicated viewpoints and exchange ideas in English.
